

FORGET COMPUTERS™

Filthy Fonts Come Clean!

Digital fonts have been around since the 80's. Yet fonts are still a big reason why QuarkXpress unexpectedly quits. Freelancers still install fonts without asking. Printers still require the appropriate fonts be included with every job. It's 2002 yet fonts can still be a real pain!

Relax. There is hope. Forget Computers's *Filthy Fonts Come Clean!* program is designed to rid offices of font frustration.

STEP 1 : GATHER

Gather ALL your fonts into one location and burn them to a CD.

STEP 2 : CLEAN

Send your font CD to Forget Computers where we will weed out duplicate fonts. Fix damaged and missing font pieces. Reduce extra font sizes. And organize each font into easily searchable folders.

STEP 3 : FINESSE

Work with Forget Computers to resolve the most stubborn font problems.

STEP 4 : REPLACE

Watch in wonder as Forget Computers replaces your current font library and turns your office into a freshly organized, frustration-free font environment.

STEP 5 : MAINTAIN

This step is critical! Maintain and control your new font library with Forget Computers's *Invisible Font Folder* system. Or implement a client/server font package (recommended for offices of five or more designers).

HOW MUCH WILL THIS COST?

Forget Computers will implement our *Filthy Fonts Come Clean!* program in your office for as little as \$99 per workstation plus a \$150 setup fee. (Forget Computers Proactive Service Members see side note).

This program pays for itself in the time it saves and the frustration it reduces. Plus, the benefits are long lasting! (See list of benefits).

Contact your Forget Computers Agent today or call 312 217.0734 and demand that your *Filthy Fonts Come Clean!*

Note to Proactive Service Members:

It is Forget Computers's goal to do as much work as we can at no additional charge during each monthly visit. However, font organization is so time consuming it simply cannot be done during a single visit. In addition to the time spent working on this font program during your monthly visit you can expect a minimum of one and a maximum of three hours billed at your additional-work rate.

BENEFITS OF THE FILTHY FONTS COME CLEAN! PROGRAM

- Fewer crashes
- Applications open faster
- Font library remains "clean"
- Very difficult to accidentally trash a font
- Collecting fonts for output is faster
- Fonts are synchronized throughout the office
- Fonts remain synchronized with very little upkeep
